

WORLD FUTURES

Creating Sustainable Futures (including understanding systems)

- NF1 How do we depend on the natural world?
- NF2 What is biodiversity?
- NF3 How can we maintain the natural world?
- NF4 Why does technology continue to change and how does this impact on us?

- F1 How do we get what we need to maintain sustainability?
- F2 How does fulfilling my needs and wants impact on others and our environment?
- F3 How do different systems in my body work together to keep me healthy?
- F4 How do basic economic systems work?
- F5 How can we create a sustainable world?

- CF1 What happens when we change the natural world?
- CF2 What is the role of innovation & technology?
- CF3 Why does technology continue to change and how does this impact on us?

Natural World

- N1 What is the natural world?
- N2 What happens when we change the natural world?

Constructed World

- C1 What is a constructed world?
- C2 Why do we construct?

- NC1 How does our environment impact on our needs?
- NC2 What systems exist in the natural and built environment?
- NC3 Why are systems important?
- NC4 Where do we fit into the natural and constructed environment?
- NC5 Why does technology continue to change and how does this impact on us?
